Air Properties & Measurements - Rheem

Class description:

This training program will review fundamental concepts related to air properties, duct system design and indoor airflow measurements. The participant will be able to demonstrate an understanding of the required instrumentation and procedures for accurate measurements. Duct static pressure, velocity, and heat-rise calculations are emphasized. Field diagnostic strategies and measurement analysis techniques will assist Technicians of any skill level in identifying airflow-related field issues.

Where: Ed's Learning Center
540 Brick Church Park Dr
Nashville, TN 37207

When: Thursday, March 21, 2024
